# Bafang and MTB Olympic Champion Bart Brentjens forge development and sponsorship partnership

Together they will develop a victory-ready E-MTB for the American Eagle brand, to compete in the newly-formed UCI electric mountain bike racing class. And in the run-up to the 2020 Olympic Games in Tokyo, Bafang become team sponsors for one of the world’s most successful Elite XC teams.

*Wijchen, Netherlands / Suzhou, China, 10th January 2019* – Bafang is marking the start of the 2019 MTB racing season by becoming the first ever manufacturer of pedelec drive systems to sponsor the UCI World Cup. What’s more, they are doing so at the very highest level: the ‘**CST sandd. Bafang Mountainbike Racing Team**’ is truly world class when it comes to wins, podium places and Championship titles.

Agreed with a handshake – left Bart Brentjens, right Jack Brandsen. Photo: Bafang

This level of performance is simply a continuation of the example set to the team, which was founded in 2008, by its captain Bart Brentjens (Netherlands), first with his World Championship title (1995 in Kirchzarten, Germany), but above all with his Gold Medal victory in MTB at the Olympic Games of 1996 in Atlanta, USA.

Bafang’s commitment extends well beyond simple sports sponsorship. The e-bike drive system specialists based in Suzhou (China), have agreed an intensive development collaboration with Bart Brentjens’ MTB brand American Eagle, with the aim of producing an E-MTB capable of competing at the highest level – tuned and ready to race in the World Championships for the new ‘E-Mountain Bike’ class, which was recently announced by cycle sport’s world governing body, the UCI. The Championships will be contested in late August 2019 in Mont St. Anne, Canada.

Demonstrating Bart Brentjens’ total commitment to this project is the fact that an additional development engineer has already joined his team: Kjell van den Boogert (Netherlands). But driving technical innovations is just one of his duties; as a former UCI World Championships Junior rider he will also compete himself in the 2019 E-MTB race season.

**Bafang M500 – the super-powerful mid motor**

A key element in Bafang and American Eagle’s future racing success is the M500 drive system. Its nominal power rating of 250 watts reflects the universal legal limit for pedelecs, but with its impressive 95 Newton metres of torque, the key factor when it comes to dynamic ride performance, it leaves most of its competitors far behind.

Other advantages include a motor weight of just 3.3kg and an ISIS bottom bracket to be combined with a high quality crankset. Bafang can supply a wide variety of displays to use with the system, and also an inTube battery pack integrated into the downtube. Battery capacity will be decided to comply with the UCI rules for E-MTB racing, the details of which have not yet been announced.

“At Bafang we are delighted to have agreed both this intensive collaboration to develop highly-competitive e-mountain bikes AND to be supporting one of the most successful Elite MTB teams in the world as sponsors. For me this is a perfect example of a win-win situation – and one which we hope will pay off soon with race wins!”, said Jack Brandsen, Europe General Manager for Bafang Electric Motor Science Technology B.V., at the contract signing at Bafang’s Netherlands office in Wijchen.

Bart Brentjens added: “I have always been someone who wants to develop new things and bring them to fruition. This is a tremendous step forwards which will bring fresh energy to our team and our sport. I have a really good feeling about both the upcoming UCI World Championship and the current popularity of e-bikes in general: this is going to be a hugely rewarding new challenge.”

**About BAFANG: [www.bafang-e.com](http://www.bafang-e.com)**

Bafang, one of Asia's leading manufacturers of e-mobility components and complete e-drive systems, has been developing components and complete systems for electric vehicles since 2003. Currently Bafang has a yearly manufacturing capacity of up to one million motors and systems for e-bikes and electric kick scooters.

The company focuses on all global e-mobility trends of the future: be it as an individual e-bike, e-kick scooter or for public bike sharing schemes.

Bafang employs more than 450 staff worldwide in four locations. The head office, development and manufacturing center is based in Suzhou, near Shanghai. Bafang has Sales and Service Centres in the Netherlands, in the USA and in Germany.
